List of 4 questions:

1/- The theme for the 2015 RVCC covers legal issues regarding the use of marine resources, is this, for you, a problem that hinders your innovations and if so why? Secondly, what solutions have you (or would you have) found? More generally, in your area what are the obstacles in the development of your projects?

2/- In France, particularly in the West, there are facilitators (Pôles, Technopôles, Clusters, Réseaux, CRITT) to help you innovate or to know the regional biotech dynamic; what are your relations with these and how are their actions useful to you?

3/- What are the "skills channels” that you have used to contribute to the development of your products and services?

4/- The RVCCs are an opportunity to meet potential partners; do such initiatives seem relevant to you and what topics would you like to see covered in the future to provide strong evidence of partnership?
